ESTEBAN ORDONEZ

PROFILE

Certified Fullstack Developer with a BA Degree in Law and an AS Degree in Computer Information Systems. Tri-lingual (English, Spanish, French) specializing in JavaScript across front and back-end platforms (Node.js, Express, React, Jest, PostgreSQL). Experienced in building web apps, iOS apps and profit-driving features from end-to-end using custom API integrations.

EXPERIENCE

FULLSTACK WEB DEVELOPER at STREAMILY.COM

Remote - 07/2020 - 05/2022

- Internship + Full Time Contractor managing end-to-end builds.
- Working cross-functionally to build revenue-generating features for platform leveraging JavaScript, SQL, Express and Node.js.
- Design and build features from end-to-end including product extensions, certificates of authenticity, upsell merchandise, discount code redemption and reporting and referral codes and UX features.

ACHIEVEMENTS

- Implemented first customer dashboard for the main website. Added capability for customers to see their orders history, update purchase customization and personal information. Laid out bases to present customer with different upsell options.
- Implemented system to capture casual purchases and convert them into user account with access to customer dashboard and the respective upselling opportunities.
- Implemented system where vendors had the possibility to share their revenue with other vendors by adding products and sell them conjointly. Created a modal where a vendor could bring another vendor to participate on the product, set percentage cut and sale personalization.
- Implemented a system for admin personal to set roles and rules to talent.

PROJECTS

FULLSTACK DEVELOPER - THE GREAT LINKERATOR

DEPLOY - JULY 2021

- Mock-up social platform for sharing websites: classified data through a tag system and tracked popularity.
- Individually created a full-stack web application in 14 days using React.js, JavaScript, HTML, React-Bootstrap Express, PostgreSQL.
- Built front-end user interface using modular React components.
- Built back-end routing and database using PostgreSQL, Node.js and Express.

CONTRIBUTING DEVELOPER - GRACE SHOPPER

DEPLOY - AUGUST 2021

- E-commerce site where users can buy records.
- Collaborated on a team of 4 to develop a full stack web application.
- Developed back-end RESTful and routing using Node.js and Express.
- Designed a relational PostgreSQL database schema supporting the back-end of the web application.
- Organized a project management workflow to include objective-driven meetings, resource allocation, task assignments.
